

*Recommended for non-translucent skinrock

SKINROCK®
created in switzerland

Skinrock is suitable for all interior and exterior walls. The lightweight and yet stable veneers can be installed quickly and easy (by specialist). After an initial impregnation, the natural stone can be cleaned and maintained in a single pass. The extraordinary feature of SKINROCK is its *translucence ability, offering a versatile range of backlightable products to enhance any interior or design project.

OTHER COLOUR

Tiles made of natural stones

• Skinrock® is an innovative product made of natural stones, extracted from slate and quartzite.

• Such method is mastered by only a few manufacturers in the world.

• Because of the specific product attributes Skinrock® is incredibly light, flexible and

• Even the large Skinrock® tile (120 x 250 cm) is incredibly light and can be glued to almost any substrate type.
